

Environment Policy

Scope of Business

The Diamond Metal Finishing Company Ltd was established in 1945 as a metal finishing facility to local industry and have since become zinc electroplating, aluminium conversion and powder coating specialists for the UK market

Policy Statement:

The company acknowledges that its processes could have a potential affect on the environment and therefore recognise its responsibility and obligation to preventing pollution and to minimise any impact.

Commitment:

This policy is achieved through a commitment to:

- Administering an Environmental Management System to BS EN ISO 14001.
- Reviewing and understanding the current and potential impact of its activities, products and services on the environment
- Complying with all current applicable and relevant environmental laws, regulations and codes of practice
- Adapting to mitigating climate change, reducing carbon footprint of the business
- Ensuring this policy is understood, implemented and maintained by all individuals in the company
- Raising environmental awareness for all employees, encouraging involvement and giving support through suitable education and training in environmental matters as required
- Monitoring and continually improving the activities impacting on the environment and the performance of the internal Environmental controls
- Using resources wisely and minimising waste
- Reducing pollution, optimising recycling and using energy and natural resources more efficiently
- Openly communicating progress in reducing the environmental impact to any interested parties and responding appropriately to reasonable requests for information
- This policy is reviewed annually as part of the management review agenda and is available on request

Signed:  Date: 27th January 2017

Mark Oates (Managing Director)
