

REACH Compliance

We acknowledge our responsibility as an “actor” in the supply chain to provide information on the composition of articles we supply to you (Article 33), including confirming the absence or presence of any SVHC (Substance of Very High Concern).

Two of the products we use in our processes contain substances classed as SVHC, therefore we have acquired confirmation from our suppliers that the products we use are permissible pursuant to the transitional regime set out in article 58(1)(c) (ii) REACH.

Meaning that the point of supply is directly or indirectly one of the 7 CTAC Sub Consortium members and the product is used within the remit of the authorization applied for.
